

Hello and welcome to the library database system!

This guide will help teach you how to operate this app and be able to use all aspects of this program.

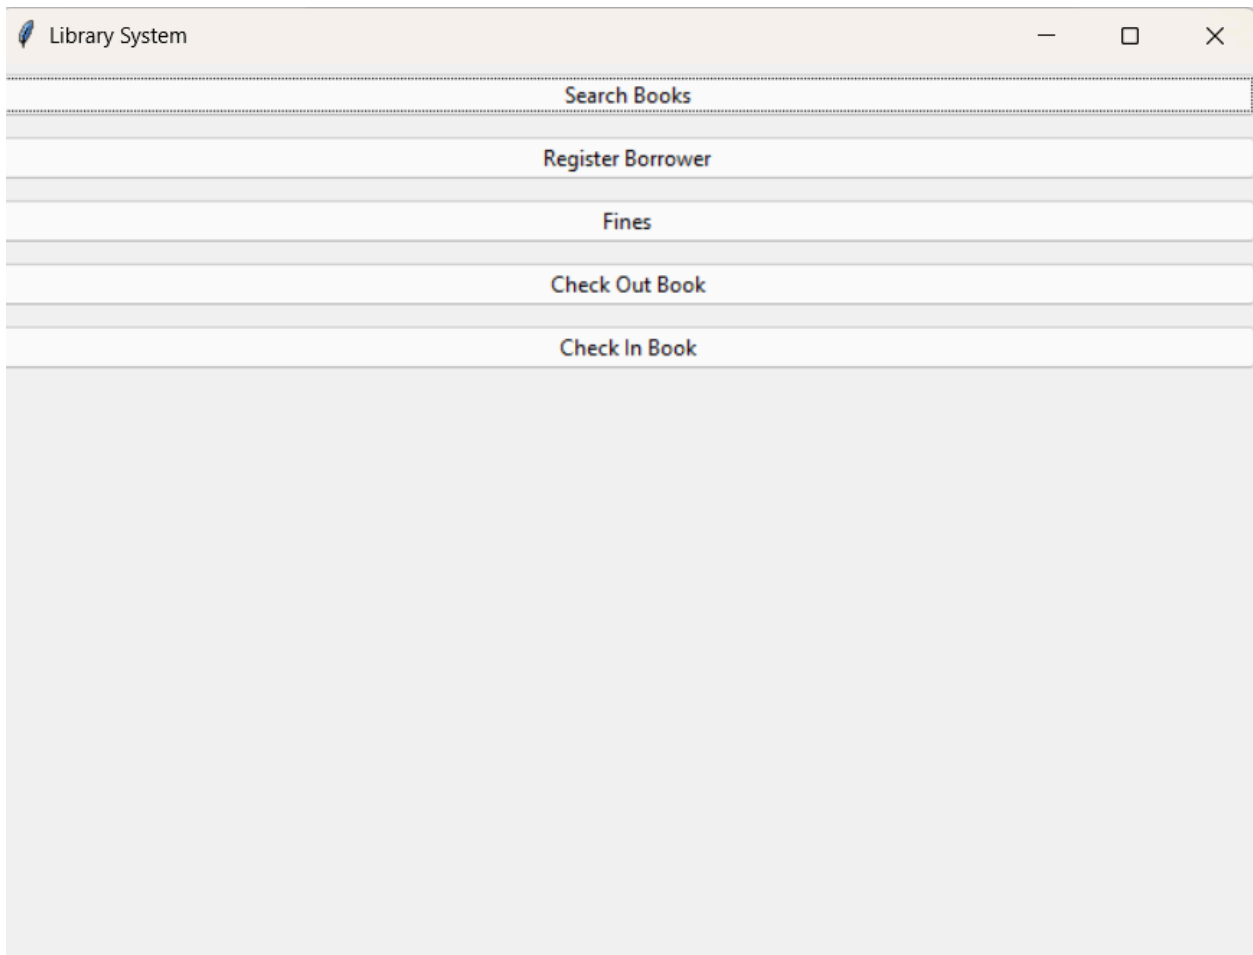

To start the program go to the folder in which the code is found and type in

`python ui/main_gui.py`

Like so:

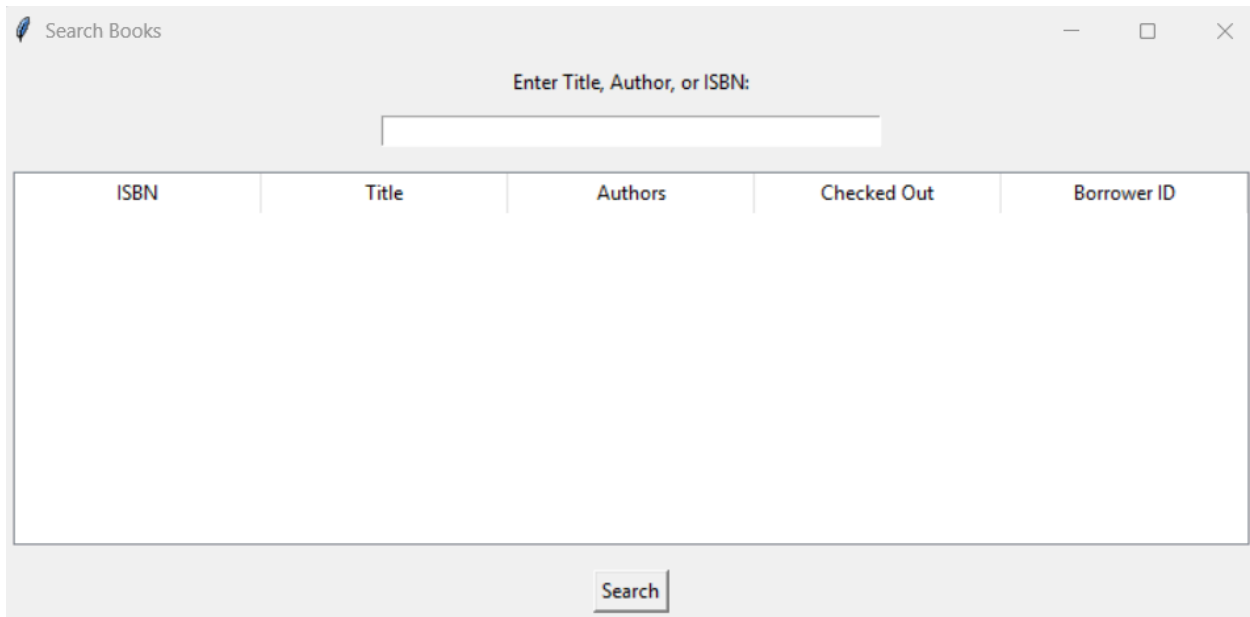

```
PS C:\Users\akshu\Downloads\cs4347_project-main(1)\cs4347_project-main> python ui/main_gui.py
```

It will open up a program that looks like this:

We will run through each of the features sequentially in this guide:

Search Books:

The screenshot shows a window titled "Search Books" with a search bar and a table. The search bar is labeled "Enter Title, Author, or ISBN:" and is empty. The table has five columns: ISBN, Title, Authors, Checked Out, and Borrower ID. The table is currently empty.

ISBN	Title	Authors	Checked Out	Borrower ID
------	-------	---------	-------------	-------------

Search

When the “Search Books” option is clicked, it will look like this. Here you will be prompted to put in key information of the book you are looking for to look it up in the database (Title , Author, ISBN).

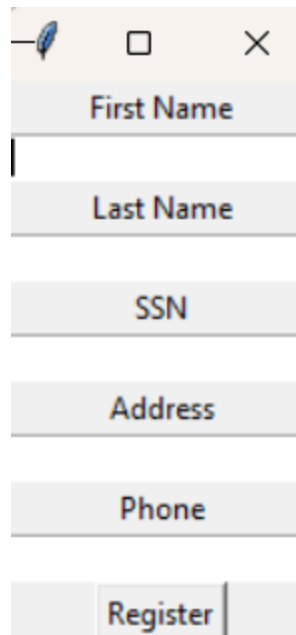

The screenshot shows the same "Search Books" window, but now the search bar contains the text "Will". The table below shows search results for books containing the keyword "Will".

ISBN	Title	Authors	Checked Out	Borrower ID
0312870582	01-01-00	Peter McWilliams	OUT	1234
156512281X	100 Birds And How They G	William Backus	IN	
0696207397	101 Full-Size Quilt Blocks A	Marlisa Szwilius Dr	IN	
088001539X	20th Century Pleasures	G. William Domhoff	IN	
1558505857	365 TV-Free Activities You	Terry Tempest Williams	IN

0804118558	A Breach Of Promise (Willi	Sailor Jim Johnston	IN	
0312154895	A Cab Called Reliable: A Nc	William Pollack	IN	

Search

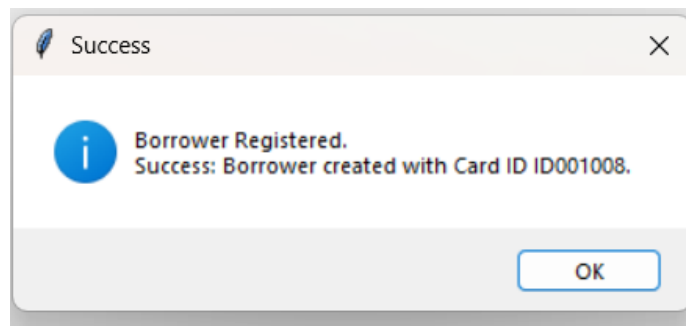

When you search for a book through a keyword (part of title or name) any partial match will come up. If you want a specific book then put in the exact name or author or the right ISBN.

Register borrower:

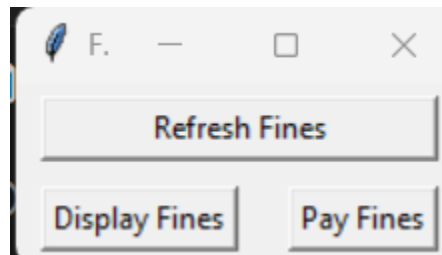

A registration form with a title bar containing a feather icon, a maximize button, and a close button. The form consists of six input fields stacked vertically: 'First Name', 'Last Name', 'SSN', 'Address', 'Phone', and a 'Register' button at the bottom.

When the “Register borrower” option is selected, a pop up page like shown above will appear. Enter the relevant information in the specified fields above each input box, and then hit the register button.

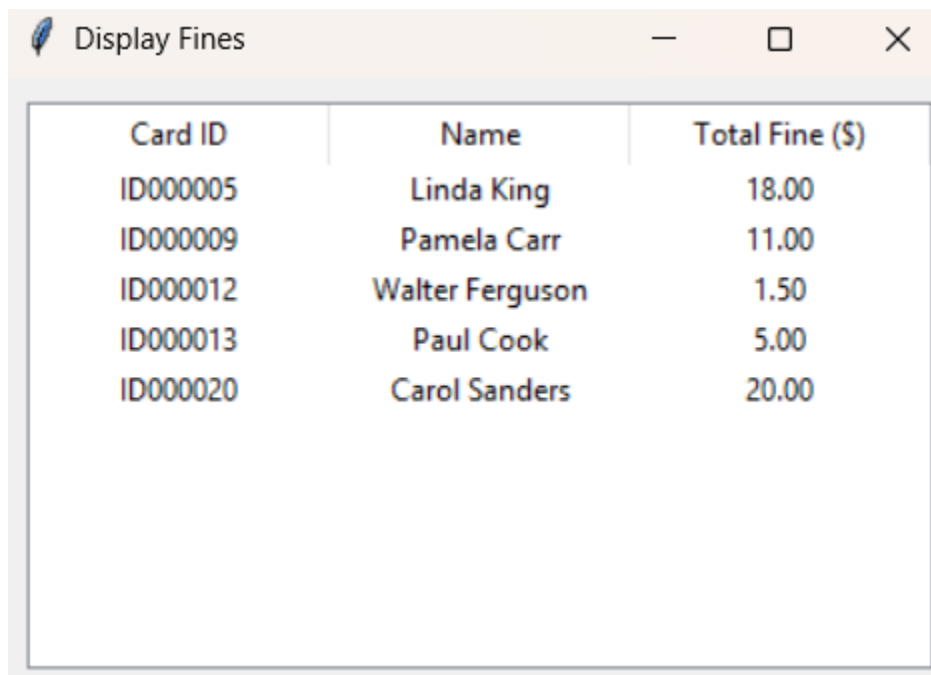

If the borrower is successfully registered, then a pop up screen as shown above will appear that will give the new Card ID issued to the new borrower. If the registration failed, an error message will appear with the specific reason for the failure.

Fine management system:

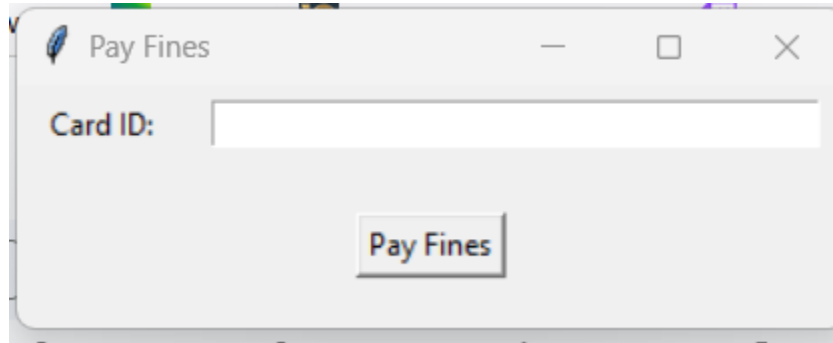

There are three sections to the fines section. “Refresh Fines”, “Display Fines” and “Pay Fines”. When you refresh the fines, any fines that have been paid or added to the system will update.

A screenshot of a software window titled 'Display Fines' with standard Windows window controls. The window displays a table with three columns: 'Card ID', 'Name', and 'Total Fine (\$)'. The table contains five rows of data.

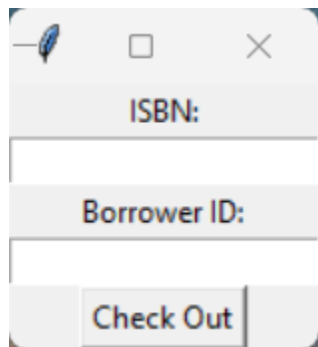

Card ID	Name	Total Fine (\$)
ID000005	Linda King	18.00
ID000009	Pamela Carr	11.00
ID000012	Walter Ferguson	1.50
ID000013	Paul Cook	5.00
ID000020	Carol Sanders	20.00

When you hit “Display Fines”, it will show all the information of patrons with fines on their account.

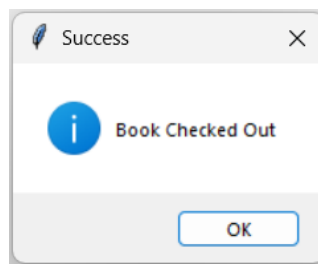

“Pay Fines” is where you put in the id of the borrower who paid off their fines to clear them in the system.

Check Out Book:

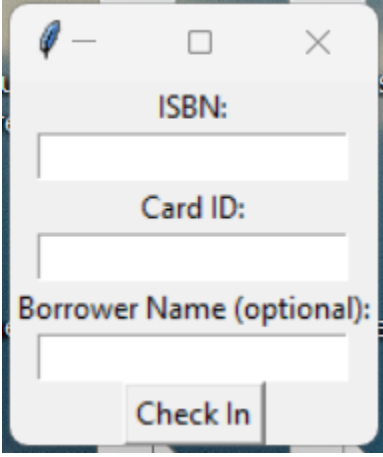

When you click on the “Check out Book” option, a pop up screen will appear which will ask you to enter the ISBN of the book you wish to check out as well as your borrower ID.

Upon successful checkout, a pop-up screen will appear confirming the book you requested has been checked out.

Check In:

A dialog box titled "Check In" with a feather icon in the top-left corner. It contains three text input fields labeled "ISBN:", "Card ID:", and "Borrower Name (optional):". At the bottom right is a button labeled "Check In".

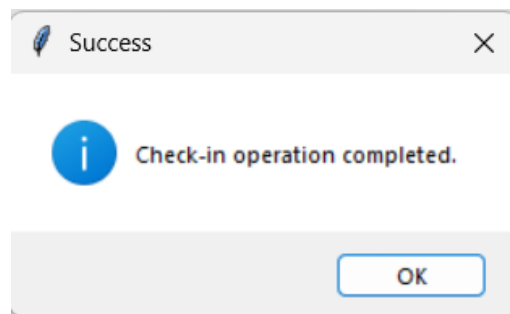

ISBN:

Card ID:

Borrower Name (optional):

Check In

When you select the “Check In” option, a pop up window will appear that will ask you to enter the ISBN of the book you wish to return, your Card ID, and your name if you cannot enter in your Card ID.

Upon successful check-in, a confirmation message will appear showing that the user has checked in the book they have previously checked out.
